JOURNAL OF GUIDANCE, CONTROL, AND DYNAMICS
Vol. 19, No. 6, November–December 1996

1996 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 1399–1405, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 1406 and 1407, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1408–1415, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1996, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Unified Development of Lateral-Directional Departure Criteria **G96-072**
Experimental Evaluation of an Adaptive Controller for a Wind-Driven Pitch Manipulator **G96-100**

Aeroelasticity and Aeroservoelasticity

Effect of Actuator Nonlinearities on Aeroservoelasticity **G96-048**
Application of a Learning Control Algorithm to a Rotor Blade Tab **G96-222**

Aerospace Plane

Altitude for Maximum Angular Velocity About the Earth During Hypersonic Cruise **G96-193**

Cabin Environment, Crew Training, and Life Support

Linear Quadratic Flight Control for Ejection Seats **G96-002**

Communication and Air Traffic Control

Capture Conditions for Merging Trajectory Segments to Model Realistic Aircraft Descents **G96-067**

Flight Control Integration

Multiple Control Effector Rate Limiting **G96-004**
Effect of Actuator Nonlinearities on Aeroservoelasticity **G96-048**
Nonlinear Inverse Dynamics Control of Aircraft Using Spoilers **G96-070**

Flight Mechanics

Optimal Feedback Control of a Nonlinear System: Wing Rock Example **G96-022**
Optimal Aircraft Terrain-Following Flight with Nonlinear Engine Dynamics **G96-032**
Numerical Computation of Orbit Error Covariance Functions **G96-034**
Near-Optimal Highly Robust Guidance for Aeroassisted Orbital Transfer **G96-083**
Flight Envelopes for Hypersonic Aerorendezvous at Constant Altitude **G96-149**
Robust Predictor–Corrector Guidance for Aeroassisted Orbital Transfer **G96-180**

Performance

Flight Envelopes for Hypersonic Aerorendezvous at Constant Altitude **G96-149**

Rotorcraft

Advanced Helicopter Flight Control Using Two-Degree-of-Freedom H^{∞} Optimization **G96-068**

Safety

Robust Fault Detection Filter Design **G96-028**
Methodology for Alerting-System Performance Evaluation **G96-065**

Simulation

Sampled-Data System with Computation Time Delay: Optimal W-Synthesis Method **G96-088**

Testing, Flight and Ground

Experimental Evaluation of an Adaptive Controller for a Wind-Driven Pitch Manipulator **G96-100**
Development and Flight Test of Terrain-Referenced Guidance with Ladar Forward Sensor **G96-132**

Vibration

Approximate Pole Placement for Acceleration Feedback Control of Flexible Structures **G96-039**
Self-Sensing Magnetostrictive Actuator for Vibration Suppression **G96-109**

Weather Hazards

Nonlinear Inverse Dynamics Control of Aircraft Using Spoilers **G96-070**

Fluid Dynamics

Wave Motion and Sloshing

Fuel Slosh in Skewed Tanks **G96-185**

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Reply by the Authors to Nivritti Vithoba Kadam **G95-010**
Four-Dimensional Guidance of Atmospheric Vehicles **G96-015**
Optimal Feedback Control of a Nonlinear System: Wing Rock Example **G96-022**
Integrated Aircraft–Controller Design Using Linear Matrix Inequalities **G96-066**
Experimental Evaluation of an Adaptive Controller for a Wind-Driven Pitch Manipulator **G96-100**
Characterization of Periodic Motions in Aircraft Lateral Dynamics **G96-101**
Fuel Slosh in Skewed Tanks **G96-185**
Altitude for Maximum Angular Velocity About the Earth During Hypersonic Cruise **G96-193**
Modified Recursive Maximum Likelihood Adaptive Filter for Nonlinear Aircraft Flight-Path Reconstruction **G96-207**
Determination of Equilibrium Points for an Aircraft Dynamic Model **G96-225**

Aircraft Guidance

Guidance, Navigation, and Control from Instrumentation to Information Management **G96-001**
Full Envelope Flight Control System Design Using Qualitative Feedback Theory **G96-003**
Long Flight-Time Range-Optimal Aircraft Trajectories **G96-033**
Should Controls Be Eliminated While Solving Optimal Control Problems via Direct Methods? **G96-062**
Capture Conditions for Merging Trajectory Segments to Model Realistic Aircraft Descents **G96-067**
Near-Optimal Highly Robust Guidance for Aeroassisted Orbital Transfer **G96-083**
Development and Flight Test of Terrain-Referenced Guidance with Ladar Forward Sensor **G96-132**
Robust Predictor–Corrector Guidance for Aeroassisted Orbital Transfer **G96-180**
Decoupling of the Longitudinal Modes of Advanced Aircraft **G96-189**

Aircraft Stability and Control

F8 Neurocontroller Based on Dynamic Inversion G96-020
Feedback Design for Unstable Plants with Saturating Nonlinearities: Single-Input, Single-Output G96-025
Prescribed Pole Placement with Optimal Weight Selection for Single-Input Controllable Systems G96-038
Effect of Actuator Nonlinearities on Aeroservoelasticity G96-048
Design and Robustness Analysis of Gain-Scheduled Control System for Parabolic Flight G96-064
Integrated Aircraft–Controller Design Using Linear Matrix Inequalities G96-066
Advanced Helicopter Flight Control Using Two-Degree-of-Freedom H^{∞} Optimization G96-068
Unified Development of Lateral-Directional Departure Criteria G96-072
Quantitative Performance Robustness Linear Quadratic Optimal System Design G96-090
Robust Control Design Strategy with Parameter-Dominated Uncertainty G96-091
Direct Optimization of Gain Scheduled Controllers via Genetic Algorithms G96-095
Mixed H_2/H_{∞} Optimal Control for an Elastic Aircraft G96-097
Design of an Autoland Controller for an F-14 Aircraft Using $\mathcal{H}_{\infty}$ Synthesis G96-098
Adaptive Control of Feedback Linearizable Nonlinear Systems with Application to Flight Control G96-139
Adaptive-Critic-Based Neural Networks for Aircraft Optimal Control G96-142
Optimized Feedforward Design Scheme Unifying Regulator and Command Generator Tracker G96-143
Control of Wing Rock Using Adaptive Feedback Linearization G96-144
Regional Pole Placement Method for Discrete-Time Systems G96-157
Nonlinear Autopilot Design for Bank-to-Turn Steering of a Flight Vehicle G96-159
Discrete-Time, Mixed-Norm Control Synthesis Applied to Aircraft Terrain Following G96-174
Quantitative Feedback Theory with a Scheduled Gain for Full Envelope Longitudinal Control G96-175
Development and Flight Testing of Quantitative Feedback Theory Pitch Rate Stability Augmentation System G96-177
Fuel Slosh in Skewed Tanks G96-185
Decoupling of the Longitudinal Modes of Advanced Aircraft G96-189
Optimal Planar Evasive Aircraft Maneuvers Against Proportional Navigation Missiles G96-196
Lyapunov Stability Analysis of Daisy Chain Control Allocation G96-199
Mixed Linear-Quadratic/Eigenstructure Strategy for Design of Stability Augmentation Systems G96-200
Application of Real Structured Singular Values to Flight Control Law Validation G96-201
Stability and Flying Qualities Robustness of a Dynamic Inversion Aircraft Control Law G96-205
Determination of Equilibrium Points for an Aircraft Dynamic Model G96-225

Artificial Intelligence

F8 Neurocontroller Based on Dynamic Inversion G96-020
Multivariable Control of the J-85 Turbojet Engine for Full Flight Envelope Operation G96-145

Astrodynamics

Satellite Pitch Dynamics in the Elliptic Problem of Three Bodies G96-009
General Formulation for N-Body Tethered Satellite System Dynamics G96-010
Deployment/Retrieval Control of a Tethered Subsatellite Under Effect of Tether Elasticity G96-011
Numerical Computation of Orbit Error Covariance Functions G96-034
Nonlinear Transformation Methods for Gravity-Turn Descent G96-035
New Approach to Halo Orbit Determination and Control G96-042
Orbital Planar Maneuvers Using Two and Three-Four (Through Infinity) Impulses G96-043
Approximate Initial Lagrange Costates for Continuous-Thrust Spacecraft G96-044
Low-Thrust Flyby Guidance and an Extended Optimal Spacing Rule G96-053
Near-Optimal Low-Thrust Lunar Trajectories G96-073
Near-Optimal Highly Robust Guidance for Aeroassisted Orbital Transfer G96-083
Wave Approach for Control of Orientation and Vibration of a Flexible Structure G96-087
Direct Optimization Using Collocation Based on High-Order Gauss–Lobatto Quadrature Rules G96-089
Compact Finite Burn Targeting and Reconstruction Algorithm G96-129
Transfer Orbits in the Earth–Moon System Using a Regularized Model G96-147
Real-Time Optimal State Feedback Control for Tethered Subsatellite System G96-156
Optimal Power-Limited Rendezvous with Upper and Lower Bounds on Thrust G96-179
Robust Predictor–Corrector Guidance for Aeroassisted Orbital Transfer G96-180
Powered Swingby G96-181
Analytical Vibration and Resonant Motion of a Stretched Spinning Nonlinear Tether G96-184
Periodic Motion in the Tethered Satellite System G96-194
First Results of Reduced Dynamics with DORIS on TOPEX/Poseidon and SPOT G96-208
Preliminary Study of Optimal Thrust-Limited Path-Constrained Maneuvers G96-209
Explicit, Near-Optimal Guidance for Power-Limited Transfers Between Coplanar Circular Orbits G96-211

Avionics Systems

Sensitivity Analysis Algorithm for the State Chi-Square Test G96-029
Methodology for Alerting-System Performance Evaluation G96-065

Computer Science

Nearly Nominal Linear-Quadratic-Gaussian Compensators for Reduced-Order Control Design Initialization G96-040

Control System Design

Comment on "Matrix Method for Eigenstructure Assignment: The Multi-Input Case with Application" G94-146
Comment on "Special Section: Hubble Space Telescope Control" G95-029
Linear Quadratic Flight Control for Ejection Seats G96-002
Performance Enhancement for a Missile in the Presence of Saturating Actuators G96-005
Analysis of the Dereverberated Transfer Function in Finite Dimensions G96-012
Four-Dimensional Guidance of Atmospheric Vehicles G96-015
Fuel Optimal Propulsive Maneuver of an Experimental Structure Exhibiting Spacelike Dynamics G96-019
F8 Neurocontroller Based on Dynamic Inversion G96-020
Nonlinear H_{∞} Optimal Control for Agile Missiles G96-021
Robust Control Design Framework for Substructure Models G96-024
Feedback Design for Unstable Plants with Saturating Nonlinearities: Single-Input, Single-Output G96-025
Prescribed Pole Placement with Optimal Weight Selection for Single-Input Controllable Systems G96-038
Nearly Nominal Linear-Quadratic-Gaussian Compensators for Reduced-Order Control Design Initialization G96-040
Experimental Validation of an Integrated Controls-Structures Design Methodology G96-050
Dynamic Programming Approach for Burnout-to-Apogee Guidance of Precision Munitions G96-052
Designs of Learning Controllers Based on Autoregressive Representation of a Linear System G96-054
Reduced-Order Compensation Using the Hyland–Bernstein Optimal Projection Equations G96-061
Design and Robustness Analysis of Gain-Scheduled Control System for Parabolic Flight G96-064
Integrated Aircraft–Controller Design Using Linear Matrix Inequalities G96-066
Advanced Helicopter Flight Control Using Two-Degree-of-Freedom H^{∞} Optimization G96-068
Nonlinear Inverse Dynamics Control of Aircraft Using Spoilers G96-070
Stability Analysis on Earth Observing System AM-1 Spacecraft Earth Acquisition G96-078
Synchronization of Twin-Gyro Precession Under Cross-Coupled Adaptive Feedforward Control G96-081
Sampled-Data System with Computation Time Delay: Optimal W-Synthesis Method G96-088
Quantitative Performance Robustness Linear Quadratic Optimal System Design G96-090
Robust Control Design Strategy with Parameter-Dominated Uncertainty G96-091
Parametric Robustness Evaluation of a H_{∞} Missile Autopilot G96-093
H_{∞} Control of an Earth Observation Satellite G96-094
Direct Optimization of Gain Scheduled Controllers via Genetic Algorithms G96-095
Mixed H_2/H_{∞} Optimal Control for an Elastic Aircraft G96-097
Self-Sensing Magnetostrictive Actuator for Vibration Suppression G96-109
Precise Trajectory Tracking Control of Elastic Joint Manipulator G96-110
Passivity Motivated Controller Design for Flexible Structures G96-114
Sliding Control Using Output Feedback G96-116
Parametric Uncertainty Reduction in Robust Missile Autopilot Design G96-117
Frequency Domain Control of Single Input/Single Output Distributed Parameter Systems G96-118
Optimal Control of a Rigid Body with Dissimilar Actuators G96-119
Motion Control of a Free-Floating Variable Geometry Truss Part 2: Inverse Kinematic G96-124

Adaptive Control of a Zero-Stiffness Suspension System G96-128
Reaching Conditions for Variable Structure Control with Output Feedback G96-136
Optimally Scaled $\mathcal{H}_\infty$ Full Information Control Synthesis with Real Uncertainty G96-137
Adaptive Control of Feedback Linearizable Nonlinear Systems with Application to Flight Control G96-139
Synthesis of Optimal H_∞ Controllers via H_2-Based Loop-Shaping Design G96-140
μ Synthesis Using Linear Quadratic Gaussian Controllers G96-141
Control of Wing Rock Using Adaptive Feedback Linearization G96-144
Multivariable Control of the J-85 Turbojet Engine for Full Flight Envelope Operation G96-145
Adaptive Attitude Control for an Artificial Satellite with Mobile Bodies G96-150
Fuel-Efficient Pulse Command Profiles for Flexible Spacecraft G96-151
Novel Approach to Reconfigurable Control Systems Design G96-153
Pole Assignment for Optimal Regulators with a Nonnegative Definite Weighting Matrix G96-154
Regional Pole Placement Method for Discrete-Time Systems G96-157
Nonlinear Autopilot Design for Bank-to-Turn Steering of a Flight Vehicle G96-159
Vibration Control of Flexible Structures Using a Combined H_∞ Filter Approach G96-163
New Pulse-Modulation Technique for Guidance and Control of Automated Spacecraft G96-164
Robust Control of Passive-Jointed Robot and Experimental Validation Using Sliding Mode G96-168
Robust Digital Autopilot Design for Spacecraft Equipped with Pulse-Operated Thrusters G96-169
Gain-Scheduled Bank-to-Turn Autopilot Design Using Linear Parameter Varying Transformations G96-170
High-Performance Active Control of Dynamically Complex Space Structures G96-172
Robust H_∞ Stabilizing Controllers for a Seeker Scan Loop System G96-173
Discrete-Time, Mixed-Norm Control Synthesis Applied to Aircraft Terrain Following G96-174
Quantitative Feedback Theory with a Scheduled Gain for Full Envelope Longitudinal Control G96-175
Development and Flight Testing of Quantitative Feedback Theory Pitch Rate Stability Augmentation System G96-177
Control and Flight Performance of Tethered Satellite Small Expendable Deployment System-II G96-182
Effect of Damping on the Structure of the Time-Optimal Control Profile G96-188
Decoupling of the Longitudinal Modes of Advanced Aircraft G96-189
Mixed Linear-Quadratic/Eigenstructure Strategy for Design of Stability Augmentation Systems G96-200
Application of Multivariable Linear Control Design to Marine Towed Systems G96-202
Homotopy Algorithm for Fixed Order Mixed H_2/H_∞ Design G96-204
Position Tracking Control of a Smart Flexible Structure Featuring a Piezofilm Actuator G96-218
Hankel Singular Values of Flexible Structures in Discrete Time G96-219
Antiwindup Controllers for Systems with Input Nonlinearities G96-223
Variable Structure Controller Design for Robust Tracking and Model Following G96-226

Control System Effectors

Multiple Control Effector Rate Limiting G96-004
Self-Sensing Magnetostrictive Actuator for Vibration Suppression G96-109
Active Control of Flexible Structures by Use of Segmented Piezoelectric Elements G96-130
Optimal Sensor Placement of Large Flexible Space Structures G96-152
Hankel Singular Values of Flexible Structures in Discrete Time G96-219
Antiwindup Controllers for Systems with Input Nonlinearities G96-223

Control System Sensors

Scanning Horizon Sensor Attitude Correction for Earth Oblateness G96-106
Optimal Sensor Placement of Large Flexible Space Structures G96-152
Hankel Singular Values of Flexible Structures in Discrete Time G96-219

Control Theory

Comment on "Matrix Method for Eigenstructure Assignment: The Multi-Input Case with Application" G94-146
Performance Enhancement for a Missile in the Presence of Saturating Actuators G96-005
Nonlinear Trajectory Tracking Guidance with Application to a Launch Vehicle G96-013
Nonlinear H_∞ Optimal Control for Agile Missiles G96-021
Optimal Feedback Control of a Nonlinear System: Wing Rock Example G96-022
Design of Stabilizing Control Laws for Mechanical Systems Based on Lyapunov's Method G96-023
Prescribed Pole Placement with Optimal Weight Selection for Single-Input Controllable Systems G96-038
Nearly Nominal Linear-Quadratic-Gaussian Compensators for Reduced-Order Control Design Initialization G96-040
New Iterative Method to Solve Optimal Control Problems with Terminal Constraints G96-041
New Approach to Halo Orbit Determination and Control G96-042
Dynamic Programming Approach for Burnout-to-Apogee Guidance of Precision Munitions G96-052
Designs of Learning Controllers Based on Autoregressive Representation of a Linear System G96-054
Frequency Domain Performance Bounds for Uncertain Positive Real Systems G96-060
Should Controls Be Eliminated While Solving Optimal Control Problems via Direct Methods? G96-062
Dense–Sparse Discretization for Optimization and Real-Time Guidance G96-076
Quantitative Performance Robustness Linear Quadratic Optimal System Design G96-090
Parametric Robustness Evaluation of a H_∞ Missile Autopilot G96-093
Spacecraft Euler Parameter Tracking of Large-Angle Maneuvers via Sliding Mode Control G96-104
Passivity Motivated Controller Design for Flexible Structures G96-114
Sliding Control Using Output Feedback G96-116
Periodic Optimal Flight G96-122
Reaching Conditions for Variable Structure Control with Output Feedback G96-136
Optimally Scaled $\mathcal{H}_\infty$ Full Information Control Synthesis with Real Uncertainty G96-137
Nonlinear Receding-Horizon State Estimation by Real-Time Optimization Technique G96-138
Adaptive Control of Feedback Linearizable Nonlinear Systems with Application to Flight Control G96-139
Optimized Feedforward Design Scheme Unifying Regulator and Command Generator Tracker G96-143
Novel Approach to Reconfigurable Control Systems Design G96-153
Pole Assignment for Optimal Regulators with a Nonnegative Definite Weighting Matrix G96-154
Asymptotic Linear Quadratic Control for Lightly Damped Structures G96-155
Regional Pole Placement Method for Discrete-Time Systems G96-157
Vibration Control of Flexible Structures Using a Combined H_∞ Filter Approach G96-163
New Pulse-Modulation Technique for Guidance and Control of Automated Spacecraft G96-164
Robust Control of Passive-Jointed Robot and Experimental Validation Using Sliding Mode G96-168
Robust Digital Autopilot Design for Spacecraft Equipped with Pulse-Operated Thrusters G96-169
Quantitative Feedback Theory with a Scheduled Gain for Full Envelope Longitudinal Control G96-175
Closed-Loop, Estimator-Based Model of Human Posture Following Reduced Gravity Exposure G96-176
Comparison and Combination of Learning Controllers: Computational Enhancement and Experiments G96-178
Optimal Power-Limited Rendezvous with Upper and Lower Bounds on Thrust G96-179
Global Stabilization of Flexible Multibody Spacecraft Using Quaternion-Based Nonlinear Control Law G96-190
Lyapunov Stability Analysis of Daisy Chain Control Allocation G96-199
Application of Real Structured Singular Values to Flight Control Law Validation G96-201
Stability and Flying Qualities Robustness of a Dynamic Inversion Aircraft Control Law G96-205
Sliding Mode Control Using Modified Rodrigues Parameters G96-221
Antiwindup Controllers for Systems with Input Nonlinearities G96-223
Variable Structure Controller Design for Robust Tracking and Model Following G96-226

Differential Games

Mixed-Strategy Guidance in Future Ship Defense G96-051
Linear Quadratic Pursuit–Evasion Games with Terminal Velocity Constraints G96-075
Inertial Space Optimal Trajectories of Aerial Three-Dimensional Pursuit–Evasion Differential Game G96-092

Dynamics

Approximate Pole Placement for Acceleration Feedback Control of Flexible Structures G96-039
New Approach to Halo Orbit Determination and Control G96-042
Dynamic Programming Approach for Burnout-to-Apogee Guidance of Precision Munitions G96-052
Multiobjective Optimization of Structures with and Without Control G96-059

Unified Development of Lateral-Directional Departure Criteria G96-072
Analytical Missile Guidance Laws with a Time-Varying Transformation G96-074
Finite Element Modeling of One-Dimensional Viscoelastic Structures Using Anelastic Displacement Fields G96-079
Dynamic Modal Truncation–Relaxation G96-080
Flexible-Body Dynamics Modeling of a Vehicle Moving on the Rails of a Structure G96-082
New Numerical Method Improving the Integration of Time in KS Regularization G96-121
Real-Time Optimal State Feedback Control for Tethered Subsatellite System G96-156
Motion of a Spacecraft with Magnetic Damper G96-160
New Method for Accurate and Consistent Identification of Modal Parameters G96-162
Momentum Transfer in Two-Rotor Gyrostats G96-183
Periodic Motion in the Tethered Satellite System G96-194

Engine Control

Multivariable Control of the J-85 Turbojet Engine for Full Flight Envelope Operation G96-145
Near-Optimal Operation of Dual-Fuel Launch Vehicles G96-187

Flight Mechanics

Comment on "Integrated Development of the Equations of Motion for Elastic Hypersonic Flight Vehicles" G95-010
Characterization of Periodic Motions in Aircraft Lateral Dynamics G96-101
Periodic Optimal Flight G96-122
Control of Wing Rock Using Adaptive Feedback Linearization G96-144
Flight Envelopes for Hypersonic Aerorendezvous at Constant Altitude G96-149
Altitude for Maximum Angular Velocity About the Earth During Hypersonic Cruise G96-193
Explicit Guidance for Aeroassisted Orbital Plane Change G96-224

Handling Qualities

Mixed Linear-Quadratic/Eigenstructure Strategy for Design of Stability Augmentation Systems G96-200
Stability and Flying Qualities Robustness of a Dynamic Inversion Aircraft Control Law G96-205

Information Processing

Efficient Class of Optimized Coning Compensation Algorithms G96-063
Methodology for Alerting-System Performance Evaluation G96-065

Launch Vehicle Dynamics

Reply by the Authors to Nivritti Vithoba Kadam G95-010

Launch Vehicle Guidance and Control

Nonlinear Trajectory Tracking Guidance with Application to a Launch Vehicle G96-013
Near-Optimal Operation of Dual-Fuel Launch Vehicles G96-187

Missile Dynamics

Comment on "Integrated Development of the Equations of Motion for Elastic Hypersonic Flight Vehicles" G95-010
Root-Mean-Square Miss Distance of a Proportional Navigation Missile Against Sinusoidal Target G96-085
Moving Mass Trim Control for Aerospace Vehicles G96-171

Missile Guidance and Control

Guidance, Navigation, and Control from Instrumentation to Information Management G96-001
Performance Enhancement for a Missile in the Presence of Saturating Actuators G96-005
Strategic Intercept Midcourse Guidance Using Modified Zero Effort Miss Steering G96-014
Nonlinear H_∞ Optimal Control for Agile Missiles G96-021
Mixed-Strategy Guidance in Future Ship Defense G96-051
Analytical Missile Guidance Laws with a Time-Varying Transformation G96-074
Linear Quadratic Pursuit–Evasion Games with Terminal Velocity Constraints G96-075
Minimizing Interceptor Size Using Neural Networks for Terminal Guidance Law Synthesis G96-084
Root-Mean-Square Miss Distance of a Proportional Navigation Missile Against Sinusoidal Target G96-085
Analytical Solution of Three-Dimensional Realistic True Proportional Navigation G96-086
Parametric Robustness Evaluation of a H_∞ Missile Autopilot G96-093
Nonlinear Flutter Analysis of Missiles with Pneumatic Fin Actuators G96-099
Exponential Criterion-Based Guidance Law for Acceleration Constrained Missile and Maneuvering Target G96-111
Analytical Solution of Generalized Three-Dimensional Proportional Navigation G96-112
Method for Improving Autopilot Lag Compensation in Intercept Guidance G96-113
Parametric Uncertainty Reduction in Robust Missile Autopilot Design G96-117
Optimally Scaled $\mathcal{H}_\infty$ Full Information Control Synthesis with Real Uncertainty G96-137
Closed-Form Optimal Guidance Law for Missiles of Time-Varying Velocity G96-165
Gain-Scheduled Bank-to-Turn Autopilot Design Using Linear Parameter Varying Transformations G96-170
Moving Mass Trim Control for Aerospace Vehicles G96-171

Navigation

Guidance, Navigation, and Control from Instrumentation to Information Management G96-001
Sensitivity Analysis Algorithm for the State Chi-Square Test G96-029
Experimental Validation of an Integrated Controls-Structures Design Methodology G96-050
Low-Thrust Flyby Guidance and an Extended Optimal Spacing Rule G96-053
Efficient Class of Optimized Coning Compensation Algorithms G96-063
Analytical Solution of Three-Dimensional Realistic True Proportional Navigation G96-086
Adaptive Orbit Determination for Interplanetary Spacecraft G96-103
Analytical Solution of Generalized Three-Dimensional Proportional Navigation G96-112
Line-of-Sight Guidance for Descent to a Minor Solar System Body G96-120
New Optimal Approach to Global Positioning System/Differential Global Positioning System Integrity Monitoring G96-166

Optimization Techniques

Minimum-Time Control Characteristics of Flexible Structures G96-016
Design of Stabilizing Control Laws for Mechanical Systems Based on Lyapunov's Method G96-023
Optimization of Generalized Potential in Mission Function Control: Analytical and Experimental Results G96-027
Finite Difference Scheme for Automatic Costate Calculation G96-031
Optimal Aircraft Terrain-Following Flight with Nonlinear Engine Dynamics G96-032
New Iterative Method to Solve Optimal Control Problems with Terminal Constraints G96-041
Integrated Controls-Structures Design Methodology: Redesign of a Evolutionary Test Structure G96-049
Multiobjective Optimization of Structures with and Without Control G96-059
Stability Augmentation Design of a Large Flexible Transport Using Nonlinear Parameter Optimization G96-069
Analytical Missile Guidance Laws with a Time-Varying Transformation G96-074
Dense–Sparse Discretization for Optimization and Real-Time Guidance G96-076
Minimizing Interceptor Size Using Neural Networks for Terminal Guidance Law Synthesis G96-084
Direct Optimization Using Collocation Based on High-Order Gauss–Lobatto Quadrature Rules G96-089
Direct Optimization of Gain Scheduled Controllers via Genetic Algorithms G96-095
Optimal Recursive Iterative Algorithm for Discrete Nonlinear Least-Squares Estimation G96-096
Mixed H_2/H_∞ Optimal Control for an Elastic Aircraft G96-097
Variational Solutions for the Heat-Rate-Limited Aeroassisted Orbital Transfer Problem G96-102
Parametric Uncertainty Reduction in Robust Missile Autopilot Design G96-117
Compact Finite Burn Targeting and Reconstruction Algorithm G96-129
Nonlinear Receding-Horizon State Estimation by Real-Time Optimization Technique G96-138
Adaptive-Critic-Based Neural Networks for Aircraft Optimal Control G96-142
Dynamic Boundary Evaluation Method for Approximate Optimal Lunar Trajectories G96-158
Discrete-Time, Mixed-Norm Control Synthesis Applied to Aircraft Terrain Following G96-174
Optimal Planar Evasive Aircraft Maneuvers Against Proportional Navigation Missiles G96-196
Method for Automatic Costate Calculation G96-203
Preliminary Study of Optimal Thrust-Limited Path-Constrained Maneuvers G96-209

Pointing Systems

Comment on "Special Section: Hubble Space Telescope Control" G95-029

Low-Thrust Flyby Guidance and an Extended Optimal Spacing Rule G96-053
Extra-Insensitive Input Shapers for Controlling Flexible Spacecraft G96-058
Attitude Determination and Control of Clementine During Lunar Mapping G96-077
Stability Analysis on Earth Observing System AM-1 Spacecraft Earth Acquisition G96-078
Variational Solutions for the Heat-Rate-Limited Aeroassisted Orbital Transfer Problem G96-102
Spacecraft Euler Parameter Tracking of Large-Angle Maneuvers via Sliding Mode Control G96-104
Spinup Maneuver and Nonlinear Active Nutation Damping G96-105
Detumbling and Reorienting Underactuated Rigid Spacecraft G96-107
Line-of-Sight Guidance for Descent to a Minor Solar System Body G96-120
Stabilization and Optimality Results for the Attitude Control Problem G96-125
Compact Finite Burn Targeting and Reconstruction Algorithm G96-129
Attitude Control for Low Lift/Drag Re-Entry Vehicles G96-131
Adaptive Attitude Control for an Artificial Satellite with Mobile Bodies G96-150
Fuel-Efficient Pulse Command Profiles for Flexible Spacecraft G96-151
Ground-Based Simulation of Space Manipulators Using Test Bed with Suspension System G96-161
New Pulse-Modulation Technique for Guidance and Control of Automated Spacecraft G96-164
REQUEST: A Recursive QUEST Algorithm for Sequential Attitude Determination G96-167
Robust Digital Autopilot Design for Spacecraft Equipped with Pulse-Operated Thrusters G96-169
Optimal Power-Limited Rendezvous with Upper and Lower Bounds on Thrust G96-179
Control and Flight Performance of Tethered Satellite Small Expendable Deployment System-II G96-182
Global Stabilization of Flexible Multibody Spacecraft Using Quaternion-Based Nonlinear Control Law G96-190
Periodic Motion in the Tethered Satellite System G96-194
Method for Automatic Costate Calculation G96-203
Homotopy Algorithm for Fixed Order Mixed H_2/H_∞ Design G96-204
Explicit, Near-Optimal Guidance for Power-Limited Transfers Between Coplanar Circular Orbits G96-211
Attitude Determination Studies for the Earth Observation System AM1 (EOS-AM1) Mission G96-212
Preliminary Star Catalog Development for the Earth Observation System AM1 (EOS-AM1) Mission G96-213
Sliding Mode Control Using Modified Rodrigues Parameters G96-221
Explicit Guidance for Aeroassisted Orbital Plane Change G96-224

State Estimation

Optimal Recursive Iterative Algorithm for Discrete Nonlinear Least-Squares Estimation G96-096
Effect of Common Process Noise on Two-Sensor Track Fusion G96-133
Indirect Identification of Linear Stochastic Systems with Known Feedback Dynamics G96-134
Measurement Reconstruction Approach for Distributed Multisensor Fusion G96-135
Nonlinear Receding-Horizon State Estimation by Real-Time Optimization Technique G96-138
REQUEST: A Recursive QUEST Algorithm for Sequential Attitude Determination G96-167
Spacecraft Attitude Estimation Using Global Positioning System: Methodology and Results for RADCAL G96-195
Modified Recursive Maximum Likelihood Adaptive Filter for Nonlinear Aircraft Flight-Path Reconstruction G96-207
First Results of Reduced Dynamics with DORIS on TOPEX/Poseidon and SPOT G96-208

Structural Control

Minimum-Time Control Characteristics of Flexible Structures G96-016
Control of a Flexible Beam Using Back Electromotive Force of Motor G96-018
Robust Control Design Framework for Substructure Models G96-024
Optimization of Generalized Potential in Mission Function Control: Analytical and Experimental Results G96-027
Integrated Controls-Structures Design Methodology: Redesign of a Evolutionary Test Structure G96-049
Experimental Validation of an Integrated Controls-Structures Design Methodology G96-050
Designs of Learning Controllers Based on Autoregressive Representation of a Linear System G96-054
Multiobjective Optimization of Structures with and Without Control G96-059
Frequency Domain Performance Bounds for Uncertain Positive Real Systems G96-060
Reduced-Order Compensation Using the Hyland–Bernstein Optimal Projection Equations G96-061
Wave Approach for Control of Orientation and Vibration of a Flexible Structure G96-087
Passivity Motivated Controller Design for Flexible Structures G96-114
Motion Control of a Free-Floating Variable Geometry Truss Part 1: Kinematics G96-123
Motion Control of a Free-Floating Variable Geometry Truss Part 2: Inverse Kinematics G96-124
Efficient Computation of Closed-Loop Frequency Response for Large-Order Flexible Systems G96-126
Active Control of Flexible Structures by Use of Segmented Piezoelectric Elements G96-130

Asymptotic Linear Quadratic Control for Lightly Damped Structures G96-155
High-Performance Active Control of Dynamically Complex Space Structures G96-172
Vibration Control of a Flexible Beam Using Shape Memory Alloy Actuators G96-186
Effect of Damping on the Structure of the Time-Optimal Control Profile G96-188
Homotopy Algorithm for Fixed Order Mixed H_2/H_∞ Design G96-204
Position Tracking Control of a Smart Flexible Structure Featuring a Piezofilm Actuator G96-218

System Identification

Optimal Sensor Placement for Modal Identification Using System-Realization Methods G96-115
Indirect Identification of Linear Stochastic Systems with Known Feedback Dynamics G96-134
On-Orbit Thruster Calibration G96-148
Comparison and Combination of Learning Controllers: Computational Enhancement and Experiments G96-178
Modified Recursive Maximum Likelihood Adaptive Filter for Nonlinear Aircraft Flight-Path Reconstruction G96-207
State-Space System Identification from Closed-Loop Frequency Response Data G96-220

Trajectory Optimization

Nonlinear Trajectory Tracking Guidance with Application to a Launch Vehicle G96-013
Optimal Time Re-Entry of Vehicles by Asymptotic Matching G96-030
Finite Difference Scheme for Automatic Costate Calculation G96-031
Optimal Aircraft Terrain-Following Flight with Nonlinear Engine Dynamics G96-032
Long Flight-Time Range-Optimal Aircraft Trajectories G96-033
Pseudoholonomic Behavior of Planar Space Robots G96-037
New Iterative Method to Solve Optimal Control Problems with Terminal Constraints G96-041
Orbital Planar Maneuvers Using Two and Three-Four (Through Infinity) Impulses G96-043
Approximate Initial Lagrange Costates for Continuous-Thrust Spacecraft G96-044
Capture Conditions for Merging Trajectory Segments to Model Realistic Aircraft Descents G96-067
Near-Optimal Low-Thrust Lunar Trajectories G96-073
Dense–Sparse Discretization for Optimization and Real-Time Guidance G96-076
Direct Optimization Using Collocation Based on High-Order Gauss–Lobatto Quadrature Rules G96-089
Variational Solutions for the Heat-Rate-Limited Aeroassisted Orbital Transfer Problem G96-102
Periodic Optimal Flight G96-122
Transfer Orbits in the Earth–Moon System Using a Regularized Model G96-147
Dynamic Boundary Evaluation Method for Approximate Optimal Lunar Trajectories G96-158
Comparison and Combination of Learning Controllers: Computational Enhancement and Experiments G96-178
Optimal Output Trajectory Redesign for Invertible Systems G96-191
Optimal Planar Evasive Aircraft Maneuvers Against Proportional Navigation Missiles G96-196
Method for Automatic Costate Calculation G96-203
Preliminary Study of Optimal Thrust-Limited Path-Constrained Maneuvers G96-209
Explicit, Near-Optimal Guidance for Power-Limited Transfers Between Coplanar Circular Orbits G96-211

Interdisciplinary Topics

Analytical and Numerical Methods

Double Averaging Approach to the Study of Spinup Dynamics of Flexible Satellites G96-007
Optimal Time Re-Entry of Vehicles by Asymptotic Matching G96-030
Numerical Computation of Orbit Error Covariance Functions G96-034
New Numerical Method Improving the Integration of Time in KS Regularization G96-121

Human Factors

Closed-Loop, Estimator-Based Model of Human Posture Following Reduced Gravity Exposure G96-176

Sensor Systems

Development and Flight Test of Terrain-Referenced Guidance with Ladar Forward Sensor G96-132
Effect of Common Process Noise on Two-Sensor Track Fusion G96-133
Measurement Reconstruction Approach for Distributed Multisensor Fusion G96-135

Launch Vehicle and Missile (LV/M) Technology

Missile Systems

Comment on "Integrated Development of the Equations of Motion for Elastic Hypersonic Flight Vehicles" G95-010

Simulation

Dynamic Modal Truncation–Relaxation G96-080

Testing, Flight and Ground

Adaptive Control of a Zero-Stiffness Suspension System G96-128

Trajectories and Tracking Systems

Atmospheric Re-Entry Control for Low Lift/Drag Vehicles G96-006
Measurement Reconstruction Approach for Distributed Multisensor Fusion G96-135
Moving Mass Trim Control for Aerospace Vehicles G96-171
Near-Optimal Operation of Dual-Fuel Launch Vehicles G96-187

Vibration

Nonlinear Flutter Analysis of Missiles with Pneumatic Fin Actuators G96-099

Propulsion

Electric and Advanced Space Propulsion

On-Orbit Thruster Calibration G96-148
Mercury Sun-Synchronous Polar Orbits Using Solar Sail Propulsion G96-214

Space Technology

Humans in Space/Life Support Systems, EVA

Closed-Loop, Estimator-Based Model of Human Posture Following Reduced Gravity Exposure G96-176

Landers

Line-of-Sight Guidance for Descent to a Minor Solar System Body G96-120

Mission Design and Analysis

Powered Swingby G96-181
Mercury Sun-Synchronous Polar Orbits Using Solar Sail Propulsion G96-214

Mission Trajectories (Earth and Interplanetary)

Nonlinear Transformation Methods for Gravity-Turn Descent G96-035
Orbital Planar Maneuvers Using Two and Three-Four (Through Infinity) Impulses G96-043
Approximate Initial Lagrange Costates for Continuous-Thrust Spacecraft G96-044
Transfer Orbits in the Earth–Moon System Using a Regularized Model G96-147
Dynamic Boundary Evaluation Method for Approximate Optimal Lunar Trajectories G96-158
Powered Swingby G96-181
Mercury Sun-Synchronous Polar Orbits Using Solar Sail Propulsion G96-214

Space Processing

Scanning Horizon Sensor Attitude Correction for Earth Oblateness G96-106

Space Systems

Nonlinear Vibrations in the Tethered Satellite System-Mission 1 G96-045
Formulation of Stability Conditions for Systems Containing Driven Rotors G96-047
Motion Control of a Free-Floating Variable Geometry Truss Part 1: Kinematics G96-123

Spacecraft Attitude Determination

Pseudoholonomic Behavior of Planar Space Robots G96-037
Attitude Determination and Control of Clementine During Lunar Mapping G96-077
Spacecraft Euler Parameter Tracking of Large-Angle Maneuvers via Sliding Mode Control G96-104
Scanning Horizon Sensor Attitude Correction for Earth Oblateness G96-106
REQUEST: A Recursive QUEST Algorithm for Sequential Attitude Determination G96-167
Spacecraft Attitude Estimation Using Global Positioning System: Methodology and Results for RADCAL G96-195
Attitude Determination Studies for the Earth Observation System AM1 (EOS-AM1) Mission G96-212
Preliminary Star Catalog Development for the Earth Observation System AM1 (EOS-AM1) Mission G96-213

Spacecraft Propulsion System Integration

Fuel Optimal Propulsive Maneuver of an Experimental Structure Exhibiting Spacelike Dynamics G96-019

Spacecraft Sensor Systems

Attitude Determination and Control of Clementine During Lunar Mapping G96-077

Spacecraft Structural Configuration, Design, and Analysis

Robust Control Design Framework for Substructure Models **G96-024**
Synchronization of Twin-Gyro Precession Under Cross-Coupled Adaptive Feedforward Control **G96-081**
Modeling of the Planar Motion of a Flexible Structure **G96-108**

Spacecraft Test and Evaluation

Ground-Based Simulation of Space Manipulators Using Test Bed with Suspension System **G96-161**

Structural Mechanics and Materials

Aeroelasticity and Control

Nonlinear Flutter Analysis of Missiles with Pneumatic Fin Actuators **G96-099**
Multivariable High-Authority Control of Plate-Like Active Structures **G96-217**
Application of a Learning Control Algorithm to a Rotor Blade Tab **G96-222**

Dynamic Model Analysis

Nonlinear Vibrations in the Tethered Satellite System-Mission 1 **G96-045**
Dynamic Modal Truncation–Relaxation **G96-080**
Flexible-Body Dynamics Modeling of a Vehicle Moving on the Rails of a Structure **G96-082**
Adaptive Control of a Zero-Stiffness Suspension System **G96-128**
New Method for Accurate and Consistent Identification of Modal Parameters **G96-162**
Analytical Vibration and Resonant Motion of a Stretched Spinning Nonlinear Tether **G96-184**

Flexible and Active Structures

Double Averaging Approach to the Study of Spinup Dynamics of Flexible Satellites **G96-007**
Deployment/Retrieval Control of a Tethered Subsatellite Under Effect of Tether Elasticity **G96-011**
Analysis of the Dereverberated Transfer Function in Finite Dimensions **G96-012**
Minimum-Time Control Characteristics of Flexible Structures **G96-016**
Exact Time-Optimal Control of the Wave Equation **G96-017**
Control of a Flexible Beam Using Back Electromotive Force of Motor **G96-018**
Extra-Insensitive Input Shapers for Controlling Flexible Spacecraft **G96-058**
Wave Approach for Control of Orientation and Vibration of a Flexible Structure **G96-087**
H_∞ Control of an Earth Observation Satellite **G96-094**
Frequency Domain Control of Single Input/Single Output Distributed Parameter Systems **G96-118**
Derivation of Zero-Gravity Structural Control Models from Analysis and Ground Experimentation **G96-127**
Active Control of Flexible Structures by Use of Segmented Piezoelectric Elements **G96-130**
Fuel-Efficient Pulse Command Profiles for Flexible Spacecraft **G96-151**
Optimal Sensor Placement of Large Flexible Space Structures **G96-152**
Vibration Control of Flexible Structures Using a Combined H_∞ Filter Approach **G96-163**
Vibration Control of a Flexible Beam Using Shape Memory Alloy Actuators **G96-186**
Position Tracking Control of a Smart Flexible Structure Featuring a Piezofilm Actuator **G96-218**

Structural Design

Integrated Controls-Structures Design Methodology: Redesign of a Evolutionary Test Structure **G96-049**

Structural Dynamics and Characterization

Global Structure Modeling Using Force-State Component Identification **G96-026**
Analytical Solution for Dynamic Analysis of a Flexible L-Shaped Structure **G96-036**
Finite Element Modeling of One-Dimensional Viscoelastic Structures Using Anelastic Displacement Fields **G96-079**
Synchronization of Twin-Gyro Precession Under Cross-Coupled Adaptive Feedforward Control **G96-081**
Optimal Sensor Placement for Modal Identification Using System-Realization Methods **G96-115**
Motion Control of a Free-Floating Variable Geometry Truss Part 1: Kinematics **G96-123**
Efficient Computation of Closed-Loop Frequency Response for Large-Order Flexible Systems **G96-126**
New Method for Accurate and Consistent Identification of Modal Parameters **G96-162**
Multivariable High-Authority Control of Plate-Like Active Structures **G96-217**

Structural Finite Elements

Finite Element Modeling of One-Dimensional Viscoelastic Structures Using Anelastic Displacement Fields **G96-079**

Structural Modeling

Global Structure Modeling Using Force-State Component Identification **G96-026**
Analytical Solution for Dynamic Analysis of a Flexible L-Shaped Structure **G96-036**
Derivation of Zero-Gravity Structural Control Models from Analysis and Ground Experimentation **G96-127**
Indirect Identification of Linear Stochastic Systems with Known Feedback Dynamics **G96-134**

Chronological Index

G94-146 Matrix Method for Eigenstructure Assignment: The Multi-Input Case with Application. S. Pradham and V. J. Modi, *The University of British Columbia, Canada*; M. S. Bhat, *Indian Institute of Science*; and A. K. Misra, *McGill University, Canada* (**17**, 5, p. 983) Article

Technical Comment by Jae Weon Choi, *Pusan National University, Korea*; Jang Gyu Lee, *Seoul National University, Korea*; and Hideto Suzuki and Takashi Suzuki, *NASDA/Tsukuba Space Center, Japan* (**19**, 4, p. 983)

Reply (**19**, 4, p. 983)

G95-010 Integrated Development of the Equations of Motion for Elastic Hypersonic Flight Vehicles. Karl D. Bilimoria, *Arizona State University*; and David K. Schmidt, *University of Maryland* (**18**, 1, p. 73) Article based on AIAA Paper 92-4605

Technical Comment by Nivritti Vithoba Kadam, *Defense Research and Development Laboratory, India* (**19**, 5, p. 1198)

Reply (**19**, 5, p. 1199)

G95-029 Hubble Space Telescope Pointing Control System Design Improvement Study Results. Angelia P. Bukley, *NASA Marshall Space Flight Center* (**18**, 2, p. 194) Article

Technical Comment by Bong Wie, *Arizona State University* (**19**, 2, p. 504)

G96-001 Guidance, Navigation, and Control from Instrumentation to Information Management. Eli Gai, *Charles Stark Draper Laboratory, Inc.* (**19**, 1, p. 10) Survey Paper

G96-002 Linear Quadratic Flight Control for Ejection Seats. Kevin A. Wise and Joseph S. Brinker, *McDonnell Douglas Aerospace* (**19**, 1, p. 15) Article based on AIAA Paper 95-3320

G96-003 Full Envelope Flight Control System Design Using Qualitative Feedback Theory. Odell R. Reynolds, M. Pachter, and C. H. Houpis, *U.S. Air Force Institute of Technology* (**19**, 1, p. 23) Article

Errata (**19**, 2, p. 504)

G96-004 Multiple Control Effector Rate Limiting. Wayne C. Durham and Kenneth A. Bordignon, *Virginia Polytechnic Institute and State University* (**19**, 1, p. 30) Article

G96-005 Performance Enhancement for a Missile in the Presence of Saturating Actuators. Armando A. Rodriguez, *Arizona State University*; and James R. Cloutier, *U.S. Air Force Armament Directorate* (**19**, 1, p. 38) Article

G96-006 Atmospheric Re-Entry Control for Low Lift/Drag Vehicles. Alberto Cavallo, *Seconda Università di Napoli, Italy*; and Ferdinando Ferrara, *Centro Italiano Ricerche Aerospaziali, S.p.A., Italy* (**19**, 1, p. 47) Article

G96-007 Double Averaging Approach to the Study of Spinup Dynamics of Flexible Satellites. Andre P. Mazzoleni, *Texas Christian University*; Christopher D. Hall, *U.S. Air Force Institute of Technology*; and Mark C. Stabb, *Structural Dynamics Research Corporation* (**19**, 1, p. 54) Article

G96-008 Nonlinear Control of a Dual-Spin Spacecraft During Despin Through Precession Phase Lock. R. J. Kinsey, *The Aerospace Corporation*; D. L. Mingori, *University of California, Los Angeles*; and R. H. Rand, *Cornell University* (**19**, 1, p. 60) Article

G96-009 Satellite Pitch Dynamics in the Elliptic Problem of Three Bodies. Joshua Ashenberg, *Technion—Israel Institute of Technology* (**19**, 1, p. 68) Article

G96-010 General Formulation for *N*-Body Tethered Satellite System Dynamics. M. Keshmiri and A. K. Misra, *McGill University, Canada*; and V. J. Modi, *University of British Columbia, Canada* (**19**, 1, p. 75) Article

G96-011 Deployment/Retrieval Control of a Tethered Subsatellite Under Effect of Tether Elasticity. Kentaroh Kokubun and Hironori A. Fujii, *Tokyo Metropolitan Institute of Technology, Japan* (**19**, 1, p. 84) Article

G96-012 Analysis of the Dereverberated Transfer Function in Finite Dimensions. Khoichi Matsuda and Hironori A. Fujii, *Tokyo Metropolitan Institute of Technology, Japan* (**19**, 1, p. 91) Article

G96-013 Nonlinear Trajectory Tracking Guidance with Application to a Launch Vehicle. Ping Lu, *Iowa State University* (**19**, 1, p. 99) Article

G96-014 Strategic Intercept Midcourse Guidance Using Modified Zero Effort Miss Steering. Brett Newman, *Old Dominion University* (**19**, 1, p. 107) Article based on AIAA Paper 93-3890

G96-015 Four-Dimensional Guidance of Atmospheric Vehicles. Ilie Stiharu-Alexe and Jules O'Shea, *École Polytechnique de Montrealé* (**19**, 1, p. 113) Article

G96-016 Minimum-Time Control Characteristics of Flexible Structures. Lucy Y. Pao, *University of Colorado* (**19**, 1, p. 123) Article

G96-017 Exact Time-Optimal Control of the Wave Equation. T. Singh and H. Alli, *State University of New York at Buffalo* (**19**, 1, p. 130) Article

G96-018 Control of a Flexible Beam Using Back Electromotive Force of Motor. Hironori A. Fujii, Shinji Hatano, and Khoichi Matsuda, *Tokyo Metropolitan Institute of Technology, Japan* (**19**, 1, p. 135) Article

G96-019 Fuel Optimal Propulsive Maneuver of an Experimental Structure Exhibiting Spacelike Dynamics. J. L. Meyer and L. Silverberg, *North Carolina State University* (**19**, 1, p. 141) Article

G96-020 F8 Neurocontroller Based on Dynamic Inversion. Debashis Sadhukhan and Salah Feteih, *Florida A&M University and Florida State University* (**19**, 1, p. 150) Article

G96-021 Nonlinear H_∞ Optimal Control for Agile Missiles. Kevin A. Wise and Jack L. Sedwick, *McDonnell Douglas Aerospace* (**19**, 1, p. 157) Article

G96-022 Optimal Feedback Control of a Nonlinear System: Wing Rock Example. Shyh-Pyng Shue, M. E. Sawan, and Kamran Rokhsaz, *Wichita State University* (**19**, 1, p. 166) Article

G96-023 Design of Stabilizing Control Laws for Mechanical Systems Based on Lyapunov's Method. Toshiyuki Ohtsuka and Hironori A. Fujii, *Tokyo Metropolitan Institute of Technology, Japan* (**19**, 1, p. 172) Article

G96-024 Robust Control Design Framework for Substructure Models. Kyong B. Lim, *NASA Langley Research Center* (**19**, 1, p. 181) Article

G96-025 Feedback Design for Unstable Plants with Saturating Nonlinearities: Single-Input, Single-Output. R. A. Hess and S. A. Snell, *University of California, Davis* (**19**, 1, p. 191) Article based on AIAA Paper 95-0336

Errata (**19**, 5, p. 1200)

G96-026 Global Structure Modeling Using Force-State Component Identification. Brett P. Masters, Edward F. Crawley, and Marthinus C. van Schoor, *Massachusetts Institute of Technology* (**19**, 1, p. 198) Article

G96-027 Optimization of Generalized Potential in Mission Function Control: Analytical and Experimental Results. Hironori A. Fujii, Masaki Takinami, and Khoichi Matsuda, *Tokyo Metropolitan Institute of Technology, Japan* (**19**, 1, p. 207) Article

G96-028 Robust Fault Detection Filter Design. Randal K. Douglas and Jason L. Speyer, *University of California, Los Angeles* (**19**, 1, p. 214) Article

G96-029 Sensitivity Analysis Algorithm for the State Chi-Square Test. Ren Da and Ching-Fang Lin, *American GNC Corporation* (**19**, 1, p. 219) Article

G96-030 Optimal Time Re-Entry of Vehicles by Asymptotic Matching. O. Sero-Guillaume, D. Bernardin, T. Felici, and D. Zouaoui, *Centre National de la Recherche Scientifique, France*; and M. Antonicelli, *Aerospatiale, France* (**19**, 1, p. 223) Article

G96-031 Finite Difference Scheme for Automatic Costate Calculation. Hans Seywald and Renjith R. Kumar, *Analytical Mechanics Associates, Inc.* (**19**, 1, p. 231) Article

G96-032 Optimal Aircraft Terrain-Following Flight with Nonlinear Engine Dynamics. Ping Lu and Bion L. Pierson, *Iowa State University* (**19**, 1, p. 240) Engineering Note

G96-033 Long Flight-Time Range-Optimal Aircraft Trajectories. Hans Seywald, *Analytical Mechanics Associates, Inc.* (**19**, 1, p. 242) Engineering Note

G96-034 Numerical Computation of Orbit Error Covariance Functions. Kondapalli Rama Rao, *Instituto Nacional de Pesquisas Espaciais, Brazil* (**19**, 1, p. 245) Engineering Note

G96-035 Nonlinear Transformation Methods for Gravity-Turn Descent. Colin R. McInnes, *University of Glasgow, Scotland, UK* (**19**, 1, p. 247) Engineering Note

G96-036 Analytical Solution for Dynamic Analysis of a Flexible L-Shaped Structure. Hyochoong Bang, *Korea Aerospace Research Institute* (**19**, 1, p. 248) Engineering Note

G96-037 Pseudoholonomic Behavior of Planar Space Robots. Ranjan Mukherjee, *U.S. Naval Postgraduate School* (**19**, 1, p. 251) Engineering Note

G96-038 Prescribed Pole Placement with Optimal Weight Selection for Single-Input Controllable Systems. Shyh-Pyng Shue, M. E. Sawan, and Kamran Rokhsaz, *Wichita State University* (**19**, 1, p. 253) Engineering Note

G96-039 Approximate Pole Placement for Acceleration Feedback Control of Flexible Structures. C. J. Goh and W. Y. Yan, *University of Western Australia* (**19**, 1, p. 256) Engineering Note

G96-040 Nearly Nominal Linear-Quadratic-Gaussian Compensators for Reduced-Order Control Design Initialization. Emmanuel G. Collins Jr., *Florida A&M University and Florida State University*; Wassim H. Haddad, *Georgia Institute of Technology*; and Sidney S. Yang, *Rockwell International* (**19**, 1, p. 259) Engineering Note

G96-041 New Iterative Method to Solve Optimal Control Problems with Terminal Constraints. Marco Antonio Leonel Caetano, *Universidade Estadual Paulista, Brazil*; and Takashi Yoneyama, *Instituto Tecnológico de Aeronáutica, Brazil* (**19**, 1, p. 262) Engineering Note

G96-042 New Approach to Halo Orbit Determination and Control. David Cielaszyk and Bong Wie, *Arizona State University* (**19**, 2, p. 266) Article based on AIAA Paper 94-3728 CP9411

G96-043 Orbital Planar Maneuvers Using Two and Three-Four (Through Infinity) Impulses. Roger A. Broucke, *University of Texas at Austin*; and Antonio F. B. A. Prado, *National Institute for Space Research, Brazil* (**19**, 2, p. 274) Article

G96-044 Approximate Initial Lagrange Costates for Continuous-Thrust Spacecraft. James D. Thorne and Christopher D. Hall, *U.S. Air Force Institute of Technology* (**19**, 2, p. 283) Article

G96-045 Nonlinear Vibrations in the Tethered Satellite System-Mission 1. S. Bergamaschi, P. Zanetti, and C. Zottarel, *University of Padova, Italy* (**19**, 2, p. 289) Article based on AIAA Paper 94-3735 CP9411

G96-046 Dynamics and Stability of a Freely Precessing Spacecraft Containing a Nutation Damper. C. O. Chang and L. Z. Liu, *National Taiwan University, ROC*; and K. T. Alfriend, *U.S. Naval Postgraduate School* (**19**, 2, p. 297) Article

G96-047 Formulation of Stability Conditions for Systems Containing Driven Rotors. I. Michael Ross, *U.S. Naval Postgraduate School* (**19**, 2, p. 305) Article

G96-048 Effect of Actuator Nonlinearities on Aeroservoelasticity. Richard Taylor and Roger W. Pratt, *Loughborough University, England, UK*; and Brian D. Caldwell, *British Aerospace plc., England, UK* (**19**, 2, p. 309) Article

G96-049 Integrated Controls-Structures Design Methodology: Redesign of an Evolutionary Test Structure. Peiman G. Maghami, *NASA Langley Research Center*; Sandeep Gupta, *ViGYAN, Inc.*; and Kenny B. Elliot and Suresh M. Joshi, *NASA Langley Research Center* (**19**, 2, p. 316) Article

G96-050 Experimental Validation of an Integrated Controls-Structures Design Methodology. Peiman G. Maghami, *NASA Langley Research Center*; Sandeep Gupta, *ViGYAN, Inc.*; and Kenny B. Elliot and Suresh M. Joshi, *NASA Langley Research Center* (**19**, 2, p. 324) Article

G96-051 Mixed-Strategy Guidance in Future Ship Defense. Y. Lipman and J. Shinar, *Technion—Israel Institute of Technology* (**19**, 2, p. 334) Article

G96-052 Dynamic Programming Approach for Burnout-to-Apogee Guidance of Precision Munitions. Clark R. Dohrmann, G. Richard Eisler, and Rush D. Robinett, *Sandia National Laboratories* (**19**, 2, p. 340) Article

G96-053 Low-Thrust Flyby Guidance and an Extended Optimal Spacing Rule. Jun'ichiro Kawaguchi and Hiroki Matsuo, *Institute for Space and Astronautical Science, Japan* (**19**, 2, p. 347) Article

G96-054 Designs of Learning Controllers Based on Autoregressive Representation of a Linear System. Minh Q. Phan, *Princeton University*; and Jer-Nan Juang, *NASA Langley Research Center* (**19**, 2, p. 355) Article

G96-055 Adaptation of Centers of Approximation for Nonlinear Tracking Control. Andrew J. Kurdila and Jerry L. Petersen, *Texas A&M University* (**19**, 2, p. 363) Article

G96-056 Improved Tunnel Display for Curved Trajectory Following: Control Considerations. Arthur J. Grunwald, *Technion—Israel Institute of Technology* (**19**, 2, p. 370) Article

G96-057 Improved Tunnel Display for Curved Trajectory Fol-

lowing: Experimental Evaluation. Arthur J. Grunwald, *Technion—Israel Institute of Technology* (**19**, 2, p. 378) Article

G96-058 Extra-Insensitive Input Shapers for Controlling Flexible Spacecraft. William Singhose, *Massachusetts Institute of Technology*; and Steve Derezinski and Neil Singer, *Convolve, Inc.* (**19**, 2, p. 385) Article

G96-059 Multiobjective Optimization of Structures with and Without Control. Franklin Y. Cheng and Dan Li, *University of Missouri–Rolla* (**19**, 2, p. 392) Article

G96-060 Frequency Domain Performance Bounds for Uncertain Positive Real Systems. David C. Hyland, *Harris Corporation*; Emmanuel G. Collins Jr., *Florida A&M University and Florida State University*; and Wassim M. Haddad and Vijaya-Sekhar Chellaboina, *Georgia Institute of Technology* (**19**, 2, p. 398) Article

G96-061 Reduced-Order Compensation Using the Hyland–Bernstein Optimal Projection Equations. Emmanuel G. Collins Jr., *Florida A&M University and Florida State University*; Wassim M. Haddad, *Georgia Institute of Technology*; and Sidney S. Ying, *Collins Commercial Avionics, Rockwell* (**19**, 2, p. 407) Article

G96-062 Should Controls Be Eliminated While Solving Optimal Control Problems via Direct Methods? Renjith R. Kumar and Hans Seywald, *Analytical Mechanics Associates, Inc.* (**19**, 2, p. 418) Article

G96-063 Efficient Class of Optimized Coning Compensation Algorithms. M. B. Ignagni, *Honeywell Technology Center* (**19**, 2, p. 424) Article

G96-064 Design and Robustness Analysis of Gain-Scheduled Control System for Parabolic Flight. F. Amato, G. Ambrosino, and M. Mattei, *University of Naples "Federico II," Italy*; and L. Verde, *Centro Italiano Ricerche Aerospaziali, Italy* (**19**, 2, p. 430) Article

G96-065 Methodology for Alerting-System Performance Evaluation. James K. Kuchar, *Massachusetts Institute of Technology* (**19**, 2, p. 438) Article

G96-066 Integrated Aircraft–Controller Design Using Linear Matrix Inequalities. R. J. Niewoehner and I. I. Kaminer, *U.S. Naval Postgraduate School* (**19**, 2, p. 445) Article

G96-067 Capture Conditions for Merging Trajectory Segments to Model Realistic Aircraft Descents. Yiyuan Zhao, *University of Minnesota*; and Rhonda A. Slattery, *NASA Ames Research Center* (**19**, 2, p. 453) Article

G96-068 Advanced Helicopter Flight Control Using Two-Degree-of-Freedom H^{∞} Optimization. D. J. Walker and I. Postlethwaite, *Leicester University, England, UK* (**19**, 2, p. 461) Article

G96-069 Stability Augmentation Design of a Large Flexible Transport Using Nonlinear Parameter Optimization. Greta N. Ward, *The Boeing Company*; and Uy-Loi Ly, *University of Washington* (**19**, 2, p. 469) Article based on AIAA Paper 94-3590 CP948

G96-070 Nonlinear Inverse Dynamics Control of Aircraft Using Spoilers. X. D. Sun, *University of York, England, UK*; and K. G. Woodgate and J. C. Allwright, *Imperial College, England, UK* (**19**, 2, p. 475) Article based on AIAA Paper 94-3592 CP948

G96-071 Inverse and Optimal Control for Precision Aerobatic Maneuvers. K. Y. Lou, *Defense Science Organization, Singapore*; and A. E. Bryson, *Stanford University* (**19**, 2, p. 483) Article based on AIAA Paper 95-3328 CP957

G96-072 Unified Development of Lateral-Directional Departure Criteria. F. H. Lutze, W. C. Durham, and W. H. Mason, *Virginia Polytechnic Institute and State University* (**19**, 2, p. 489) Article

G96-073 Near-Optimal Low-Thrust Lunar Trajectories. Craig A. Kluever and Kun-Rong Chang, *University of Missouri–Columbia/Kansas City* (**19**, 2, p. 494) Engineering Note

G96-074 Analytical Missile Guidance Laws with a Time-Varying Transformation. S. N. Balakrishnan, *University of Missouri–Rolla* (**19**, 2, p. 496) Engineering Note

G96-075 Linear Quadratic Pursuit–Evasion Games with Terminal Velocity Constraints. Joseph Z. Ben-Asher, *Tel-Aviv University, Israel* (**19**, 2, p. 499) Engineering Note

G96-076 Dense–Sparse Discretization for Optimization and Real-Time Guidance. Renjith R. Kumar and Hans Seywald, *Analytical Mechanics Associates, Inc.* (**19**, 2, p. 501) Engineering Note

G96-077 Attitude Determination and Control of Clementine During Lunar Mapping. Glenn Creamer, *Swales and Associates, Inc.*; and Paul DeLaHunt, Steve Gates, and Marv Levenson, *U.S. Naval Research Laboratory* (**19**, 3, p. 505) Article

G96-078 Stability Analysis on Earth Observing System AM-1 Spacecraft Earth Acquisition. Xipu Li, Arthur J. Throckmorton, and Jeffrey B. Boka, *Lockheed Martin Astro Space* (**19**, 3, p. 512) Article

G96-079 Finite Element Modeling of One-Dimensional Viscoelastic Structures Using Anelastic Displacement Fields. George A. Lesieutre and Emanuele Bianchini, *Pennsylvania State University*; and Andrea Maiani, *Centro Italiano Ricerche Aerospaziali, Italy* (**19**, 3, p. 520) Article

G96-080 Dynamic Modal Truncation–Relaxation. S. Djerassi and G. J. Iddan, *RAFAEL, Ministry of Defense, Israel* (**19**, 3, p. 528) Article based on AIAA Paper 94-3574 CP948

G96-081 Synchronization of Twin-Gyro Precession Under Cross-Coupled Adaptive Feedforward Control. Li-Farn Yang and Wen-Hua Chang, *National Chung Cheng University, Taiwan, ROC* (**19**, 3, p. 534) Article

G96-082 Flexible-Body Dynamics Modeling of a Vehicle Moving on the Rails of a Structure. Achille Messac, *Northeastern University* (**19**, 3, p. 540) Article

G96-083 Near-Optimal Highly Robust Guidance for Aeroassisted Orbital Transfer. A. Miele and T. Wang, *Rice University* (**19**, 3, p. 549) Article

G96-084 Minimizing Interceptor Size Using Neural Networks for Terminal Guidance Law Synthesis. Ronald G. Cottrell, *Nichols Research Corporation*; and Thomas L. Vincent and Seyed Hossein Sadati, *University of Arizona* (**19**, 3, p. 557) Article

G96-085 Root-Mean-Square Miss Distance of a Proportional Navigation Missile Against Sinusoidal Target. Ernest J. Ohlmeyer, *U.S. Naval Surface Warfare Center* (**19**, 3, p. 563) Article

G96-086 Analytical Solution of Three-Dimensional Realistic True Proportional Navigation. Ciann-Dong Yang and Chi-Ching Yang, *National Cheng Kung University, Taiwan, ROC* (**19**, 3, p. 569) Article

G96-087 Wave Approach for Control of Orientation and Vibration of a Flexible Structure. Hironori A. Fujii, Kazunari Nakajima, and Koichi Matsuda, *Tokyo Metropolitan Institute of Technology, Japan* (**19**, 3, p. 578) Article

G96-088 Sampled-Data System with Computation Time Delay: Optimal *W*-Synthesis Method. Cheolkeun Ha, *University of Ulsan, Korea*; and Uy-Loi Ly, *University of Washington* (**19**, 3, p. 584) Article

G96-089 Direct Optimization Using Collocation Based on High-Order Gauss–Lobatto Quadrature Rules. Albert L. Herman and Bruce A. Conway, *University of Illinois at Urbana–Champaign* (**19**, 3, p. 592) Article

G96-090 Quantitative Performance Robustness Linear Quadratic Optimal System Design. Chih-Min Lin and Ze-Rong Shi, *Yuan-Ze Institute of Technology, Taiwan, ROC* (**19**, 3, p. 600) Article

G96-091 Robust Control Design Strategy with Parameter-Dominated Uncertainty. Moshe Idan and Guy E. Shaviv, *Technion—Israel Institute of Technology* (**19**, 3, p. 605) Article

G96-092 Inertial Space Optimal Trajectories of Aerial Three-Dimensional Pursuit–Evasion Differential Game. A. Segal, *Israel Aircraft Industries*; and T. Miloh, *Tel-Aviv University, Israel* (**19**, 3, p. 612) Article

G96-093 Parametric Robustness Evaluation of a H_∞ Missile Autopilot. Gilles Ferreres, *Aérospatiale Missiles, France*; and Mohammed M'Saad, *Laboratoire d'Automatique de Grenoble, France* (**19**, 3, p. 621) Article

G96-094 H_∞ Control of an Earth Observation Satellite. Sandrine Le Ballois, *IUP Génie Électrique, France*; and Gilles Duc, *École Supérieure d'Électricité, France* (**19**, 3, p. 628) Article

G96-095 Direct Optimization of Gain Scheduled Controllers via Genetic Algorithms. Stuart C. Kramer, *U.S. Air Force Institute of Technology*; and Robert C. Martin IV, *U.S. Air Force Wright Laboratory* (**19**, 3, p. 636) Article

G96-096 Optimal Recursive Iterative Algorithm for Discrete Nonlinear Least-Squares Estimation. Gordon T. Haupt, N. Jeremy Kasdin, George M. Keiser, and Bradford W. Parkinson, *Stanford University* (**19**, 3, p. 643) Article

G96-097 Mixed H_2/H_∞ Optimal Control for an Elastic Aircraft. Yigang Fan, Eugene M. Cliff, Frederick H. Lutze, and Mark R. Anderson, *Virginia Polytechnic Institute and State University* (**19**, 3, p. 650) Article

G96-098 Design of an Autoland Controller for an F-14 Aircraft Using $\mathcal{H}_\infty$ Synthesis. R. J. Niewoehner and Isaac I. Kaminer, *U.S. Naval Postgraduate School* (**19**, 3, p. 656) Article

G96-099 Nonlinear Flutter Analysis of Missiles with Pneumatic Fin Actuators. E. Yehezkely and M. Karpel, *Technion—Israel Institute of Technology* (**19**, 3, p. 664) Article

G96-100 Experimental Evaluation of an Adaptive Controller for a Wind-Driven Pitch Manipulator. J. C. Magill, N. M. Komerath, and J. F. Dorsey, *Georgia Institute of Technology* (**19**, 3, p. 671) Article based on AIAA Paper 94-3657 CP948

G96-101 Characterization of Periodic Motions in Aircraft Lateral Dynamics. N. Ananthkrishnan and K. Sudhakar, *Indian Institute of Technology* (**19**, 3, p. 680) Article

G96-102 Variational Solutions for the Heat-Rate-Limited Aeroassisted Orbital Transfer Problem. Hans Seywald, *Analytical Mechanics Associates, Inc.* (**19**, 3, p. 686) Article

G96-103 Adaptive Orbit Determination for Interplanetary Spacecraft. P. Daniel Burkhart, *Jet Propulsion Laboratory, California Institute of Technology*; and Robert H. Bishop, *University of Texas at Austin* (**19**, 3, p. 693) Article

G96-104 Spacecraft Euler Parameter Tracking of Large-Angle Maneuvers via Sliding Mode Control. Rush D. Robinett and Gordon G. Parker, *Sandia National Laboratories* (**19**, 3, p. 702) Engineering Note

G96-105 Spinup Maneuver and Nonlinear Active Nutation Damping. Hwa-Suk Oh, *Electronics and Telecommunications Research Institute, Korea* (**19**, 3, p. 704) Engineering Note

G96-106 Scanning Horizon Sensor Attitude Correction for Earth Oblateness. Jonathan A. Tekawy, Patrick Wang, and Charles W. Gray, *The Aerospace Corporation* (**19**, 3, p. 706) Engineering Note

G96-107 Detumbling and Reorienting Underactuated Rigid Spacecraft. Victoria Coverstone-Carroll, *University of Illinois at Urbana–Champaign* (**19**, 3, p. 708) Engineering Note

G96-108 Modeling of the Planar Motion of a Flexible Structure. Michael S. Holmes, A. Ray, and David R. Mudgett, *Pennsylvania State University* (**19**, 3, p. 710) Engineering Note

G96-109 Self-Sensing Magnetostrictive Actuator for Vibration Suppression. Lowell Dale Jones and Ephrahim Garcia, *Vanderbilt University* (**19**, 3, p. 713) Engineering Note

G96-110 Precise Trajectory Tracking Control of Elastic Joint Manipulator. Hamza Diken, *Istanbul Technical University, Turkey* (**19**, 3, p. 715) Engineering Note

G96-111 Exponential Criterion-Based Guidance Law for Acceleration Constrained Missile and Maneuvering Target. Ilan Rusnak, *RAFAEL, Ministry of Defense, Israel* (**19**, 3, p. 718) Engineering Note

G96-112 Analytical Solution of Generalized Three-Dimensional Proportional Navigation. Ciann-Dong Yang and Chi-Ching Yang, *National Cheng Kung University, Taiwan, ROC* (**19**, 3, p. 721) Engineering Note

G96-113 Method for Improving Autopilot Lag Compensation in Intercept Guidance. Thomas R. Blackburn, *Hughes Missile Systems Company* (**19**, 3, p. 724) Engineering Note

G96-114 Passivity Motivated Controller Design for Flexible Structures. Declan Hughes and John T. Wen, *Rensselaer Polytechnic Institute* (**19**, 3, p. 726) Engineering Note

G96-115 Optimal Sensor Placement for Modal Identification Using System-Realization Methods. Daniel C. Kammer, *University of Wisconsin–Madison* (**19**, 3, p. 729) Engineering Note

G96-116 Sliding Control Using Output Feedback. C. M. Kwan, *Automation and Robotics Research Institute* (**19**, 3, p. 731) Engineering Note

G96-117 Parametric Uncertainty Reduction in Robust Missile Autopilot Design. Jeff B. Burl, *Michigan Technological University*; and David L. Krueger, *U.S. Naval Strategic Weapons Facility* (**19**, 3, p. 733) Engineering Note

G96-118 Frequency Domain Control of Single Input/Single Output Distributed Parameter Systems. S. M. Yang and Y. C. Liu, *National Cheng Kung University, Taiwan, ROC* (**19**, 3, p. 736) Engineering Note

G96-119 Optimal Control of a Rigid Body with Dissimilar Actuators. Eric M. Queen, *NASA Langley Research Center*; and Larry Silverberg, *North Carolina State University* (**19**, 3, p. 738) Engineering Note

G96-120 Line-of-Sight Guidance for Descent to a Minor Solar System Body. Colin R. McInnes and Gianmarco Radice, *University of Glasgow, Scotland, UK* (**19**, 3, p. 740) Engineering Note

G96-121 New Numerical Method Improving the Integration of Time in KS Regularization. J. M. Ferrándiz, *Universidad de Alicante, Spain*; and J. Vigo-Aguiar, *Universidad de Salamanca, Spain* (**19**, 3, p. 742) Engineering Note

G96-122 Periodic Optimal Flight. Jason L. Speyer, *University of California, Los Angeles* (**19**, 4, p. 745) Article based on AIAA Paper 95-0001

G96-123 Motion Control of a Free-Floating Variable Geometry Truss Part 1: Kinematics. Shengyang Huang, *Toyota Technological Institute, Japan*; M. C. Natori, *Institute of Space and Astronautical Science, Japan*; and Kohichi Miura, *Nihon University, Japan* (**19**, 4, p. 756) Article

G96-124 Motion Control of a Free-Floating Variable Geometry Truss Part 2: Inverse Kinematics. Shengyang Huang, *Toyota Technological Institute, Japan*; M. C. Natori, *Institute of Space and Astronautical Science, Japan*; and Kohichi Miura, *Nihon University, Japan* (**19**, 4, p. 764) Article

G96-125 Stabilization and Optimality Results for the Attitude Control Problem. Panagiotis Tsiotras, *University of Virginia* (**19**, 4, p. 772) Article

G96-126 Efficient Computation of Closed-Loop Frequency Response for Large-Order Flexible Systems. Peiman G. Maghami, *NASA Langley Research Center*; and Daniel P. Giesy, *Lockheed Martin Engineering and Sciences* (**19**, 4, p. 780) Article

G96-127 Derivation of Zero-Gravity Structural Control Models from Analysis and Ground Experimentation. Roger M. Glaese and David W. Miller, *Massachusetts Institute of Technology* (**19**, 4, p. 787) Article

G96-128 Adaptive Control of a Zero-Stiffness Suspension System. Li-Farn Yang, Rueih-Chir Tzeng, and Chun-Pao Kuo, *National Chung Cheng University, Taiwan, ROC* (**19**, 4, p. 794) Article

G96-129 Compact Finite Burn Targeting and Reconstruction Algorithm. S. L. Hast, D. L. Oltrogge, and M. J. Hart, *The Aerospace Corporation* (**19**, 4, p. 801) Article

G96-130 Active Control of Flexible Structures by Use of Segmented Piezoelectric Elements. J. Callahan and H. Baruh, *Rutgers University* (**19**, 4, p. 808) Article

G96-131 Attitude Control for Low Lift/Drag Re-Entry Vehicles. Alberto Cavallo and Giuseppe De Maria, *Seconda Universitá di Napoli, Italy*; and Ferdinando Ferrara, *Centro Italiano Ricerche Aerospaziali, Italy* (**19**, 4, p. 816) Article

G96-132 Development and Flight Test of Terrain-Referenced Guidance with Lader Forward Sensor. Richard E. Zelenka, *NASA Ames Research Center*; Raymond F. Clark, *U.S. Army Command/Control and Systems Integration Directorate*; André Zirkler and Ron Saari, *Unixpros*; and Robert G. Branigan, *U.S. Army Night Vision and Electronic Sensor Systems Directorate* (**19**, 4, p. 823) Article

G96-133 Effect of Common Process Noise on Two-Sensor Track Fusion. R. K. Saha, *Nova Research Corporation* (**19**, 4, p. 829) Article

G96-134 Indirect Identification of Linear Stochastic Systems with Known Feedback Dynamics. Jen-Kuang Huang, *Old Dominion University*; Min-Hung Hsiao, *Taipei Institute of Technology, Taiwan, ROC*; and David E. Cox, *NASA Langley Research Center* (**19**, 4, p. 836) Article

G96-135 Measurement Reconstruction Approach for Distributed Multisensor Fusion. Lucy Y. Pao, *University of Colorado* (**19**, 4, p. 842) Article based on AIAA Paper 94-3549 CP948

G96-136 Reaching Conditions for Variable Structure Control with Output Feedback. S. V. Yallapragada, *Qualcomm Inc.*; B. S. Heck, *Georgia Institute of Technology*; and J. D. Finney, *ABB Power T&D Company* (**19**, 4, p. 848) Article

G96-137 Optimally Scaled $\mathcal{H}_\infty$ Full Information Control Synthesis with Real Uncertainty. Gary J. Balas and Rick Lind, *University of Minnesota*; and Andy Packard, *University of California, Berkeley* (**19**, 4, p. 854) Article

G96-138 Nonlinear Receding-Horizon State Estimation by Real-Time Optimization Technique. Toshiyuki Ohtsuka, *University of Tsukuba, Japan*; and Hironori A. Fujii, *Tokyo Metropolitan Institute of Technology, Japan* (**19**, 4, p. 863) Article

G96-139 Adaptive Control of Feedback Linearizable Nonlinear Systems with Application to Flight Control. Sahjendra N. Singh, *University of Nevada*; and Marc Steinberg, *U.S. Naval Air Warfare Center* (**19**, 4, p. 871) Article

G96-140 Synthesis of Optimal H_∞ Controllers via H_2-Based Loop-Shaping Design. Ciann-Dong Yang and Chia-Yuan Chang, *National Cheng Kung University, Taiwan, ROC* (**19**, 4, p. 878) Article

G96-141 μ Synthesis Using Linear Quadratic Gaussian Controllers. Ciann-Dong Yang and Chia-Yuan Chang, *National Cheng Kung University, Taiwan, ROC* (**19**, 4, p. 886) Article

G96-142 Adaptive-Critic-Based Neural Networks for Aircraft Optimal Control. S. N. Balakrishnan and Victor Biega, *University of Missouri–Rolla* (**19**, 4, p. 893) Article

G96-143 Optimized Feedforward Design Scheme Unifying Regulator and Command Generator Tracker. Dohyeon Kim and Youdan Kim, *Seoul National University, Korea* (**19**, 4, p. 899) Article based on AIAA Paper 95-3265 CP957

G96-144 Control of Wing Rock Using Adaptive Feedback Linearization. Mogen M. Monahemi and Miroslav Krstic, *University of Maryland* (**19**, 4, p. 905) Article

G96-145 Multivariable Control of the J-85 Turbojet Engine for Full Flight Envelope Operation. Shih-Tin Lin and Chun-Mo Lee, *National Chung-Hsing University, Taiwan, ROC* (**19**, 4, p. 913) Article

G96-146 Universal Formulation for the *N*-Body Problem. Pedro E. Zadunaisky, *Comision Nacional de Actividades Espaciales and Universidad de Buenos Aires, Argentina*; and Claudia M. Giordano, *Universidad Nacional de La Plata, Argentina* (**19**, 4, p. 921) Article

G96-147 Transfer Orbits in the Earth–Moon System Using a Regularized Model. Antonio Fernando Bertachini de Almeida Prado, *National Institute for Space Research, Brazil*; and Roger Broucke, *University of Texas at Austin* (**19**, 4, p. 929) Article

G96-148 On-Orbit Thruster Calibration. Peter J. Wiktor, *Engineering Arts* (**19**, 4, p. 934) Article

G96-149 Flight Envelopes for Hypersonic Aerorendezvous at Constant Altitude. Yen-Hsun Chen and Shyuan-Jye Chen, *National Central University, Taiwan, ROC*; Jeng-Shing Chern, *Chung Shan Institute of Science and Technology, Taiwan, ROC*; and Zuu-

Chang Hong, *National Central University, Taiwan, ROC* (**19**, 4, p. 941) Article based on AIAA Paper 94-3472 CP949

G96-150 Adaptive Attitude Control for an Artificial Satellite with Mobile Bodies. Katsuhiko Yamada and Shoji Yoshikawa, *Mitsubishi Electric Corporation, Japan* (**19**, 4, p. 948) Article

G96-151 Fuel-Efficient Pulse Command Profiles for Flexible Spacecraft. William Singhose, Kristen Bohlke, and Warren Seering, *Massachusetts Institute of Technology* (**19**, 4, p. 954) Article

G96-152 Optimal Sensor Placement of Large Flexible Space Structures. Emerson Tongco and Deirdre Meldrum, *University of Washington* (**19**, 4, p. 961) Engineering Note

G96-153 Novel Approach to Reconfigurable Control Systems Design. Nitin Dhayagude and Zhiqiang Gao, *Cleveland State University* (**19**, 4, p. 963) Engineering Note

G96-154 Pole Assignment for Optimal Regulators with a Nonnegative Definite Weighting Matrix. Y. Ochi and B. Wie, *Arizona State University*; and K. Kanai, *National Defense Academy, Japan* (**19**, 4, p. 967) Engineering Note based on AIAA Paper 95-3300 CP957

G96-155 Asymptotic Linear Quadratic Control for Lightly Damped Structures. Mark E. Campbell and Edward F. Crawley, *Massachusetts Institute of Technology* (**19**, 4, p. 969) Engineering Note

G96-156 Real-Time Optimal State Feedback Control for Tethered Subsatellite System. Kentaroh Kokubun, Seiichi Anazawa, and Hironori A. Fujii, *Tokyo Metropolitan Institute of Technology, Japan* (**19**, 4, p. 972) Engineering Note

G96-157 Regional Pole Placement Method for Discrete-Time Systems. Hardev Singh, D. Subbaram Naidu, and Kevin L. Moore, *Idaho State University* (**19**, 4, p. 974) Engineering Note

G96-158 Dynamic Boundary Evaluation Method for Approximate Optimal Lunar Trajectories. Matthew L. Rivas and Bion L. Pierson, *Iowa State University* (**19**, 4, p. 976) Engineering Note

G96-159 Nonlinear Autopilot Design for Bank-to-Turn Steering of a Flight Vehicle. Liang-Boon Wee, *Defence Science Organization, Singapore* (**19**, 4, p. 978) Engineering Note

G96-160 Motion of a Spacecraft with Magnetic Damper. Carlos M. Roithmayr, *NASA Johnson Space Center*; Anren Hu, *Dynacs Engineering Company*; and Richard Chipman, *Grumman Corporation* (**19**, 4, p. 980) Engineering Note

G96-161 Ground-Based Simulation of Space Manipulators Using Test Bed with Suspension System. Hironori A. Fujii, Kenji Uchiyama, and Hideharu Yoneoka, *Tokyo Metropolitan Institute of Technology, Japan*; and Tsugito Maruyama, *Fujitsu Laboratories, Ltd., Japan* (**19**, 5, p. 985) Article

G96-162 New Method for Accurate and Consistent Identification of Modal Parameters. R. M. Lin and S.-F. Ling, *Nanyang Technological University, Singapore* (**19**, 5, p. 992) Article

G96-163 Vibration Control of Flexible Structures Using a Combined H_∞ Filter Approach. Mitsumasa Sato, *Kawasaki Heavy Industries, Japan*; and Masayuki Suzuki, *Nagoya University, Japan* (**19**, 5, p. 1000) Article

G96-164 New Pulse-Modulation Technique for Guidance and Control of Automated Spacecraft. Sam W. Thurman, *Jet Propulsion Laboratory, California Institute of Technology*; and Henryk Flashner, *University of Southern California* (**19**, 5, p. 1007) Article

G96-165 Closed-Form Optimal Guidance Law for Missiles of Time-Varying Velocity. Hangju Cho and Chang Kyung Ryoo, *Agency for Defense Development, Korea*; and Min-Jea Tahk, *Korea Advanced Institute of Science and Technology* (**19**, 5, p. 1017) Article

G96-166 New Optimal Approach to Global Positioning System/Differential Global Positioning System Integrity Monitoring. Igor V. Nikiforov, *Université de Technologie de Troyes, France* (**19**, 5, p. 1023) Article based on AIAA Paper 95-3192 CP957

G96-167 REQUEST: A Recursive QUEST Algorithm for Sequential Attitude Determination. Itzhack Y. Bar-Itzhack, *NASA Goddard Space Flight Center* (**19**, 5, p. 1034) Article

G96-168 Robust Control of Passive-Jointed Robot and Experimental Validation Using Sliding Mode. Paul I. Ro and Chih-Chen Yih, *North Carolina State University* (**19**, 5, p. 1039) Article

G96-169 Robust Digital Autopilot Design for Spacecraft Equipped with Pulse-Operated Thrusters. Sam W. Thurman, *Jet Propulsion Laboratory, California Institute of Technology*; and Henryk Flashner, *University of Southern California* (**19**, 5, p. 1047) Article

G96-170 Gain-Scheduled Bank-to-Turn Autopilot Design Using Linear Parameter Varying Transformations. Lance H. Carter and Jeff S. Shamma, *University of Texas at Austin* (**19**, 5, p. 1056) Article

G96-171 Moving Mass Trim Control for Aerospace Vehicles. Rush D. Robinett III, Beverly R. Sturgis, and Shawn A. Kerr, *Sandia National Laboratories* (**19**, 5, p. 1064) Article

G96-172 High-Performance Active Control of Dynamically Complex Space Structures. D. J. Phillips, J. A. King, L. D. Davis, and D. C. Hyland, *Harris Corporation* (**19**, 5, p. 1071) Article

G96-173 Robust H_∞ Stabilizing Controllers for a Seeker Scan Loop System. H. Y. Hwang, *Agency for Defense Development, Korea*; and W. E. Schmitendorf, *University of California, Irvine* (**19**, 5, p. 1081) Article

G96-174 Discrete-Time, Mixed-Norm Control Synthesis Applied to Aircraft Terrain Following. David R. Jacques, D. Brett Ridgely, and Robert A. Canfield, *U.S. Air Force Institute of Technology* (**19**, 5, p. 1088) Article

G96-175 Quantitative Feedback Theory with a Scheduled Gain for Full Envelope Longitudinal Control. S. Antony Snell and Perry W. Stout, *University of California, Davis* (**19**, 5, p. 1095) Article based on AIAA Paper 95-3254 CP957

G96-176 Closed-Loop, Estimator-Based Model of Human Posture Following Reduced Gravity Exposure. Dava J. Newman, Karl U. Schultz, and Jennifer L. Rochlis, *Massachusetts Institute of Technology* (**19**, 5, p. 1102) Article

G96-177 Development and Flight Testing of Quantitative Feedback Theory Pitch Rate Stability Augmentation System. Paul L. Fontenrose and Charles E. Hall Jr., *North Carolina State University* (**19**, 5, p. 1109) Article

G96-178 Comparison and Combination of Learning Controllers: Computational Enhancement and Experiments. Gina J. Lee-Glauser, *Clarkson University*; Jer-Nan Juang, *NASA Langley Research Center*; and Richard W. Longman, *Columbia University* (**19**, 5, p. 1116) Article

G96-179 Optimal Power-Limited Rendezvous with Upper and Lower Bounds on Thrust. Thomas E. Carter, *Eastern Connecticut*

State University; and Cyrus J. Pardis, *Worchester Polytechnic Institute* (**19**, 5, p. 1124) Article

G96-180 Robust Predictor–Corrector Guidance for Aeroassisted Orbital Transfer. A. Miele and T. Wang, *Rice University* (**19**, 5, p. 1134) Article

G96-181 Powered Swingby. Antonio Fernando Bertachini de Almeida Prado, *National Institute for Space Research, Brazil* (**19**, 5, p. 1142) Article

G96-182 Control and Flight Performance of Tethered Satellite Small Expendable Deployment System-II. E. C. Lorenzini and S. B. Bortolami, *Harvard–Smithsonian Center for Astrophysics*; C. C. Rupp, *NASA Marshall Space Flight Center*; and F. Angrilli, *University of Padua, Italy* (**19**, 5, p. 1148) Article

G96-183 Momentum Transfer in Two-Rotor Gyrostats. Christopher D. Hall, *U.S. Air Force Institute of Technology* (**19**, 5, p. 1157) Article

G96-184 Analytical Vibration and Resonant Motion of a Stretched Spinning Nonlinear Tether. Albert C. J. Luo, Ray P. S. Han, and G. Tyc, *University of Manitoba, Canada*; V. J. Modi, *University of British Columbia, Canada*; and A. K. Misra, *McGill University, Canada* (**19**, 5, p. 1162) Article

G96-185 Fuel Slosh in Skewed Tanks. M. J. Abzug, *ACA Systems* (**19**, 5, p. 1172) Article

G96-186 Vibration Control of a Flexible Beam Using Shape Memory Alloy Actuators. Seung-Bok Choi and Chae-Cheon Cheong, *Inha University, Korea* (**19**, 5, p. 1178) Engineering Note

G96-187 Near-Optimal Operation of Dual-Fuel Launch Vehicles. M. D. Ardema, and H.-C. Chou, *Santa Clara University*; and J. V. Bowles, *NASA Ames Research Center* (**19**, 5, p. 1180) Engineering Note

G96-188 Effect of Damping on the Structure of the Time-Optimal Control Profile. T. Singh, *State University of New York at Buffalo* (**19**, 5, p. 1182) Engineering Note

G96-189 Decoupling of the Longitudinal Modes of Advanced Aircraft. M. G. Skarpetis, *National Technical University of Athens, Greece*; and F. N. Koumboulis, *University of Thessaly, Greece* (**19**, 5, p. 1184) Engineering Note

G96-190 Global Stabilization of Flexible Multibody Spacecraft Using Quaternion-Based Nonlinear Control Law. A. G. Kelkar, *Kansas State University*; and S. M. Joshi, *NASA Langley Research Center* (**19**, 5, p. 1186) Engineering Note

G96-191 Optimal Output Trajectory Redesign for Invertible Systems. S. Devasia, *University of Utah* (**19**, 5, p. 1189) Engineering Note

G96-192 Instrumentation Analysis Using Parameter Estimation of Simulated Data. Justin Wakefield Thomas, *Science Applications International Corporation*; and Charles E. Hall Jr., *North Carolina State University* (**19**, 5, p. 1191) Engineering Note

G96-193 Altitude for Maximum Angular Velocity About the Earth During Hypersonic Cruise. Nikos Markopoulos and Kenneth D. Mease, *Princeton University* (**19**, 5, p. 1193) Engineering Note

G96-194 Periodic Motion in the Tethered Satellite System. Shaohua Yu, *Chinese Academy of Sciences, PRC* (**19**, 5, p. 1195) Engineering Note

G96-195 Spacecraft Attitude Estimation Using Global Positioning System: Methodology and Results for RADCAL. Penina Axelrad and Lisa M. Ward, *University of Colorado* (**19**, 6, p. 1201) Article

G96-196 Optimal Planar Evasive Aircraft Maneuvers Against Proportional Navigation Missiles. Shaw Y. Ong, *Singapore Technologies Aerospace, Ltd., Singapore*; and Bion L. Pierson, *Iowa State University* (**19**, 6, p. 1210) Article

G96-197 Removing Bias from Discrete Time Models Based on Finite Interval Response Data. Myles L. Baker and D. Lewis Mingori, *University of California, Los Angeles* (**19**, 6, p. 1216) Article based on AIAA Paper 94-3640 CP948

G96-198 Global-Local Observer Markov Parameter Identification for System Realization. Michael Papadopoulos and Ephrahim Garcia, *Vanderbilt University*; and Robert H. Tolson, *George Washington University and NASA Langley Research Center* (**19**, 6, p. 1221) Article

G96-199 Lyapunov Stability Analysis of Daisy Chain Control Allocation. James M. Buffington and Dale F. Enns, *University of Minnesota* (**19**, 6, p. 1226) Article based on AIAA Paper 95-3341 CP957

G96-200 Mixed Linear-Quadratic/Eigenstructure Strategy for Design of Stability Augmentation Systems. Giovanni Mengali, *University of Pisa, Italy* (**19**, 6, p. 1231) Article

G96-201 Application of Real Structured Singular Values to Flight Control Law Validation. Piero Miotto and James D. Paduano, *Massachusetts Institute of Technology* (**19**, 6, p. 1239) Article

G96-202 Application of Multivariable Linear Control Design to Marine Towed Systems. J. W. Kamman, *Western Michigan University*; S. D. Patek, *Massachusetts Institute of Technology*; and S. A. Hoeckley, *Coastal Systems Station* (**19**, 6, p. 1246) Article

G96-203 Method for Automatic Costate Calculation. Hans Seywald and Renjith R. Kumar, *Analytical Mechanics Associates, Inc.* (**19**, 6, p. 1252) Article based on AIAA Paper 96-3699

G96-204 Homotopy Algorithm for Fixed Order Mixed H_2/H_∞ Design. Mark Whorton, *NASA Marshall Space Flight Center*; and Harold Buschek and Anthony J. Calise, *Georgia Institute of Technology* (**19**, 6, p. 1262) Article

G96-205 Stability and Flying Qualities Robustness of a Dynamic Inversion Aircraft Control Law. Joseph S. Brinker and Kevin A. Wise, *McDonnell Douglas Aerospace* (**19**, 6, p. 1270) Article

G96-206 Reduction of Coolant Fuel Losses in Hypersonic Flight by Optimal Trajectory Control. Gottfried Sachs and Michael Dinkelmann, *Technical University of Munich, Germany* (**19**, 6, p. 1278) Article based on AIAA Paper 95-3371 CP957

G96-207 Modified Recursive Maximum Likelihood Adaptive Filter for Nonlinear Aircraft Flight-Path Reconstruction. Q. P. Chu, J. A. Mulder, and P. T. L. M. van Woerkom, *Delft University of Technology, The Netherlands* (**19**, 6, p. 1285) Article

G96-208 First Results of Reduced Dynamics with DORIS on TOPEX/Poseidon and SPOT. Béatrice Barotto and Jean-Paul Berthias, *Centre National d'Etudes Spatiales, France* (**19**, 6, p. 1296) Article based on AIAA Paper 94-3778 CP9411

G96-209 Preliminary Study of Optimal Thrust-Limited Path-Constrained Maneuvers. Russel S. Wenzel, *Lockheed Martin Missiles and Space Company, Inc.*; and John E. Prussing, *University of Illinois at Urbana–Champaign* (**19**, 6, p. 1303) Article

G96-210 Optimality and Guidance for Planar Multiple-Burn Orbit Transfers. C.-H. Chuang, Troy D. Goodson, and Laura A. Ledsinger, *Georgia Institute of Technology*; and John Hanson, *NASA Marshall Space Flight Center* (**19**, 6, p. 1310) Article

G96-211 Explicit, Near-Optimal Guidance for Power-Limited Transfers Between Coplanar Circular Orbits. Nikos Markopoulos, *Georgia Institute of Technology* (**19**, 6, p. 1317) Article based on AIAA Paper 95-3359 CP957

G96-212 Attitude Determination Studies for the Earth Observation System AM1 (EOS-AM1) Mission. P. Kudva, *McDonnell Douglas Aerospace*; and A. Throckmorton, *Lockheed Martin Missiles and Space* (**19**, 6, p. 1326) Article based on AIAA Paper 94-3561 CP948

G96-213 Preliminary Star Catalog Development for the Earth Observation System AM1 (EOS-AM1) Mission. P. Kudva, *McDonnell Douglas Aerospace*; and A. Throckmorton, *Lockheed Martin Missiles and Space* (**19**, 6, p. 1332) Article based on AIAA Paper 94-3619 CP948

G96-214 Mercury Sun-Synchronous Polar Orbits Using Solar Sail Propulsion. Manfred E. Leipold, *German Aerospace Research Establishment, Germany*; and Otto Wagner, *Technical University of Munich, Germany* (**19**, 6, p. 1337) Article

G96-215 Eigenvector Scaling for Mode Localization in Vibrating Systems. Franz J. Shelley and William W. Clark, *University of Pittsburgh* (**19**, 6, p. 1342) Article

G96-216 Sensor Placement for Time-Domain Modal Parameter Estimation. Chinchao Liu and Frederick A. Tasker, *University of Maryland Baltimore County* (**19**, 6, p. 1349) Article

G96-217 Multivariable High-Authority Control of Plate-Like Active Structures. Kenneth B. Lazarus, Edward F. Crawley, and Charrissa Y. Lin, *Massachusetts Institute of Technology* (**19**, 6, p. 1357) Article

G96-218 Position Tracking Control of a Smart Flexible Structure Featuring a Piezofilm Actuator. Seung-Bok Choi, Chae-Cheon Cheong, and Chul-Hee Lee, *Inha University, Korea* (**19**, 6, p. 1364) Article

G96-219 Hankel Singular Values of Flexible Structures in Discrete Time. K. B. Lim, *NASA Langley Research Center*; and W. Gawronski, *Jet Propulsion Laboratory, California Institute of Technology* (**19**, 6, p. 1370) Article based on AIAA Paper 96-3757

G96-220 State-Space System Identification from Closed-Loop Frequency Response Data. Jen-Kuang Huang, Hyun Chang Lee, and Marco P. Schoen, *Old Dominion University*; and Min-Hung Hsiao, *Taipei Institute of Technology, Taiwan, ROC* (**19**, 6, p. 1378) Engineering Note

G96-221 Sliding Mode Control Using Modified Rodrigues Parameters. John L. Crassidis, *Catholic University of America*; and F. Landis Markley, *NASA Goddard Space Flight Center* (**19**, 6, p. 1381) Engineering Note

G96-222 Application of a Learning Control Algorithm to a Rotor Blade Tab. Janusz P. Narkiewicz, *Warsaw University of Technology, Poland*; and George T. S. Done, *City University, England, UK* (**19**, 6, p. 1383) Engineering Note

G96-223 Antiwindup Controllers for Systems with Input Nonlinearities. Wassim M. Haddad and Vikram Kapila, *Georgia Institute of Technology* (**19**, 6, p. 1387) Engineering Note

G96-224 Explicit Guidance for Aeroassisted Orbital Plane Change. Der-Ming Ma, *Tamkang University, Taiwan, ROC* (**19**, 6, p. 1390) Engineering Note based on AIAA Paper 94-3527 CP949

G96-225 Determination of Equilibrium Points for an Aircraft Dynamic Model. Giulio Avanzini, *University of Rome "La Sapienza," Italy*; and Guido de Matteis, *Politecnico di Torino, Italy* (**19**, 6, p. 1392) Engineering Note

G96-226 Variable Structure Controller Design for Robust Tracking and Model Following. Kuo-Kai Shyu and Chih-Yuan Liu, *National Central University, Taiwan, ROC* (**19**, 6, p. 1395) Engineering Note
